

**TO:** Whom It May Concern

**FROM:** Dr. Ram Sundaram, Professor, ECE Dept., Gannon University, Erie, PA

**SUBJECT:** Letter of reference for Roberto Mossi Milla, CIS student, Gannon University, Erie, PA

**DATE:** February 20, 2025

Roberto A. Mossi Milla is one of the most outstanding undergraduate students in the Computer and Information Science (CIS) program at Gannon University. Roberto is a diligent and conscientious worker who, in addition to excellence in course work, has been actively and proactively engaged in project activities which significantly benefit faculty-led research projects. I strongly recommend him to the internship and technical positions based on the following attributes.

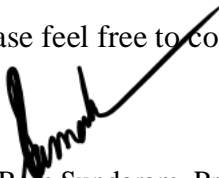

***Excellence in course work***

Roberto contributes to the courses by proposing novel and creative solutions to problems, laboratory exercises, and course projects. Through his course work and participation in course projects, he continues to successfully demonstrate the ability to do independent and original work, traits which are essential for research and scholarship in industry.

***Independent and original research work leading to peer-reviewed presentations and conference papers***

Roberto has been working on research projects in the engineering and CIS programs. He has submitted a peer-reviewed and peer-communicated conference paper in higher education (ASEE). He is a creative and original thinker and works efficiently and skillfully, well within the deadlines. He has a sound grasp of the hardware and software requirements of engineering projects, ranging from simple to complex.

Please feel free to contact me if additional information is required.
